

MevoRainbow® – The Perfect Coat Hanger

The combination of high-quality zinc coating and additional PE sheath combines all the advantages of the respective technologies to give you the best clothes hanger of all time. You and your customers will treasure it!

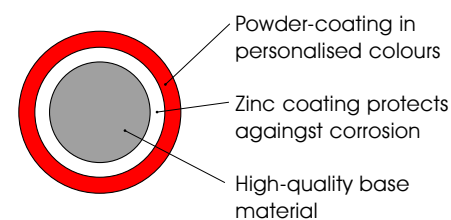

- The **2-layer technology** guarantees both consistently good looks and longer and multiple usability.
- In addition to the standard colours - **white, yellow, orange, red, violet, blue, green and black** - there is also the MevoRainbow in any desired colour from a certain purchase quantity. The colourful hanger is ideal for in-house laundry separation or for acceptance or branch marking.
- The non-powder-coated hook guarantees **100 % conveyor belt compatibility** and consistent sliding properties. The flaking and roughening of the sliding surface of the hook due to constant movement on the conveyor belt is consigned to the past. The hook thus remains clean and free from traces of use, making the hanger perfect for multiple uses.
- **Save money and protect the environment!** Extremely high stability (due to the high-quality carrier material) and the consistently good looks enable frequent use of the clothes hanger without any compromises.
- As the very first powder-coated hanger, MevoRainbow is **manufactured in accordance with Austria's most up-to-date product and ecological standards**. All powder-coated hangers to previously appear on the market were produced in the Far East.
