

Mevo Struthanger

100% made in Austria

This hanger - which is well known from overseas - has a fixed tube with latex to avoid slipping down of garments. It also guarantees flat garments without creases. Mevo has adapted the struthanger according to the needs of state of the art conveyor belt systems.

NEW

The Mevo Struthanger is manufactured in our own factory in Austria. It's shape has been adapted to the needs of the latest conveyor belt systems. This article enables our customers a perfect hanging of trousers.

In addition it can also be used for outerwear due to its perfect 'collar shape'. The spiral tube has been especially developed and it is coated with a heat resistant and biodegradable latex. The coating is covering only the top part of the tube

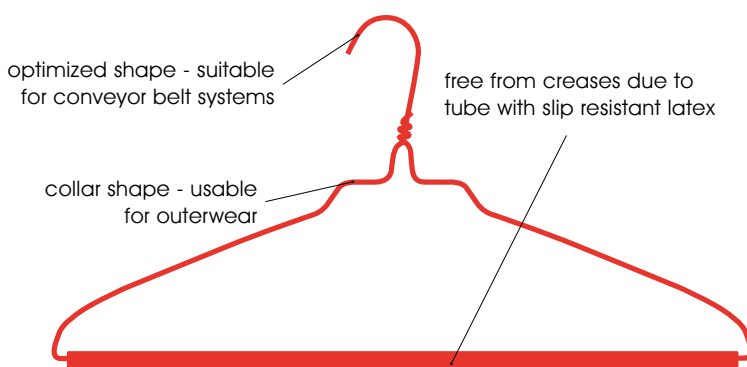

which helps to keep the rest of the tube extremely clean.

The Mevo-Struthanger is persuading with:

- optimized shape for fully automated loading and unloading of conveyor belt systems
- flexibility in use due to 'collar shape' (usable for outerwear and trousers)
- high stability (top quality tube and high strength of wire)
- slip resistance (coated tube)

- perfect hanging of garments due to optimized shape
- the spiral tube helps to save on raw materials and minimizes the risk of falling down of garments
